Double Wall Round Spiral Pipe and Fittings Construction

Double Wall Round – Spiral Pipe – Solid / Solid

Solid / Solid means solid materials are used on both the outer and inner shells.

Double Wall Round – Spiral Pipe – Solid / Perforated

Solid / Perforated means solid materials are used on the outer shell and perforated materials on the inner shells.

- Standard double wall pipe and fittings are supplied with 1” thick, 1-1/2# density fiberglass insulation.
- Double wall spiral pipe is available in lengths from 1 to 20 feet. (Specify when ordering).
- Standard double wall fittings are provided with a solid inner liner. Fittings are available with perforated liner when specified.
- Insulation is available in 1”, 2”, and 3” thickness with 1-1/2# density.
- Standard double wall pipe and fittings are slip joint construction; other connection options are available upon request.
- Pipe and fittings are available in all SMACNA pressure classifications.
- Pipe and fittings can be fabricated for either positive or negative systems.
